

PERFORMANCE ANALYSIS SERVICES

Power up your network and reduce IT costs

We are pleased to announce the availability of a new services package that provides monthly analysis and onsite consultations by our knowledgeable team of consultants. This affordably priced package enables organizations to reduce internal IT costs by taking control of their business-computing infrastructure, increasing the security of IT resources, and increasing the ROI of your existing IT investment – **without hiring additional staff.**

If this sounds like you, we can help!

- We need to reduce IT costs internally, while increasing service levels
- We need to focus IT resources on supporting business processes
- We can't allocate budget towards a dedicated IT person
- We can't tolerate downtime and financial losses from server/application failures
- We need to minimize the chance that viruses may infect our network
- We need a snapshot of our current security environment to identify weak areas
- We are evaluating the impact of new applications and/or technology upgrades

OFFER DETAILS:

Package includes:

- Monthly onsite analysis and consultation, covering these areas:
 - Faults
 - Network performance summaries
 - System performance summaries
 - Vulnerability summaries and detailed assessments
 - Patch summaries and detailed assessments
 - Asset summaries

Service Period: Monitoring and monthly consultations are good for (1) year.

Reduce IT costs and business risk

Monthly Review Meetings

Our consultants will sit down with you to share our findings and recommendations.

We will suggest ways to optimize performance.

We help you address migrations and new application roll-outs.

Better Planning, Needs Justification

Improve your ability to plan and justify additional capacity.

Detailed Performance Reports

Technical Expertise

Gain access to top technical expertise at minimal cost.

Onsite consultations help to increase the availability and security of your IT resources, which makes for happier users.
